- [Position Statement](#) - Feeding Tubes in Advanced Dementia (2014)

Choosing Wisely®

Choosing Wisely® is an initiative of the American Board of Internal Medicine Foundation to help clinicians and patients engage in conversations to reduce overuse of tests and procedures, and support patients in their efforts to make smart and effective care choices. More than 70 [specialty society partners](#) have released recommendations with the intention of facilitating wise decisions about the most appropriate care based on a patients' individual situation.

- The [American Academy of Hospice and Palliative Medicine](#) and the [American Geriatric Society](#) listed this recommendation as #1 of their top 5 in 2013, the first year of the Choose Wisely Campaign:

***Don't RECOMMEND percutaneous feeding tubes in individuals with advanced dementia.
Instead, offer oral assisted feedings.***

- The [American Medical Directors Association](#) – The Society for Post-Acute and Long-Term Care Medicine (AMDA) listed this recommendation as #1 of their top 5 in 2013, the first year of the Choose Wisely Campaign:

***Don't INSERT percutaneous feeding tubes in individuals with advanced dementia.
Instead, offer oral assisted feedings.***

Clinical Frailty Scale (CFS)©

Geriatric Medicine Research, Dalhousie University, Halifax, Canada. Permission granted to copy the Clinical Frailty Scale for research and education purposes only.
